

Video Game Intervention for Kids with ADHD, ASD and/or CHD
**COGNITIVE REHABILITATION (MEGA TEAM) AND ITS EFFECTS ON EMOTIONAL AND BEHAVIOURAL
REGULATION IN ADHD, ASD and CHD**

The Department of Psychiatry is undertaking an exciting new research study where we will be looking to see if a **video game** can help improve behavioural control and working memory in kids.

You can help us out with our research study if you are/or have a:

- ❖ A child with a diagnosis of either:
 - Attention Deficit Hyperactivity Disorder (ADHD)
 - Autism Spectrum Disorder (ASD) and/or
 - Congenital Heart Disease (CHD)
- ❖ Between 6-12 years of age
- ❖ Willing to come to SickKids for 3 study visits
- ❖ Willing to play the video game at home for 5 weeks

If you are interested in participating in this study and/or would like more information please contact:
